

Sprint 2 Report
TeachShare
Team TeachBears
Revision 1: July 19, 2017

Actions to stop doing

- Don't catch every exception.
 - We want Django to throw exceptions so that we can know what is going on.

Actions to start doing

- Add standard for URLs, user error messages, and html indentation in style guide
 - We want our code to look consistent and readable.
- Reallocate pages so everything is not under /accounts
 - We want paths to be intuitive.

Actions to keep doing

- Pair programming
 - Working together makes tasks go by more quickly.
- Branching by feature
 - This makes it easier for anyone to work on any feature without excessive merge conflicts.

Work completed

All Sprint 2 user stories were completed during the sprint.

- As a teacher, I want to be able to register as a user to TeachShare and store my information such as my school, district, grade level teaching, and subjects taught so that I can find projects and teachers related to my teaching interests.
- As a registered teacher, I want to be able to post my project and lesson ideas and descriptions of these projects so that I can collaborate and help others give high quality lessons.
- As a registered teacher, I want to be able to view all posts on TeachShare so that I can find other registered teachers' posts.

Work completion rate

Sprint 2 Work Completion Statistics

Total number of user stories implemented: 3

Total number of estimated ideal work hours completed: 36

Total number of days: 7

Average user stories implemented per day: $3/7$ or approximately 0.429

Average ideal work hours spent per day: $36/7$ or approximately 5.14

Sprint 1 Work Completion Statistics

Total number of user stories implemented: 3

Total number of estimated ideal work hours completed: 38

Total number of days: 7

Average user stories implemented per day: $3/7$ or approximately 0.429

Average ideal work hours spent per day: $38/7$ or approximately 5.43

Total Work Completion Statistics

Total number of user stories implemented: 6

Total number of estimated ideal work hours completed: 74

Total number of days: 14

Average user stories implemented per day: $6/14$ or approximately 0.429

Average ideal work hours spent per day: $74/14$ or approximately 5.29
