Sprint 3 Report
TeachShare
Team TeachBears
Revision 1: July 24, 2017

Actions to stop doing
- No more video calls!
  - We usually do not do video calls since the first experience and we've been good about avoiding them. We had to make an exception for Sunday's meeting and it was a reminder that they still make communication more difficult.

Actions to start doing
- Comment more, especially on python files
- Delete unused Git branches
- Refactor URLs for consistency
- Cleaning up code and deleting unnecessary parts

Actions to keep doing
- Paired programming
  - This still worked really well for implementing certain features. A user story we estimated to take five hours was finished in two hours using paired programming.

Work completed
All Sprint 3 user stories were completed during the sprint.
- As a registered teacher, I want to be able to upload files so that I can have actual lesson plan material.
- As a registered teacher, I want to be able to view the files uploaded to some other user's post.
- As a registered teacher, I want to be able to tag (keywords, categories, etc) projects so others can find my projects easily.
- As a registered teacher, I want to be able to search others' posts by their tags so that I can find others' projects easily to use in my lessons.
- As a registered teacher I want to be able to like a post and have it save to a favorites page so that I can easily access it in the future.
- As a registered teacher, I want to be able to comment or discuss other projects so others can have feedback.

Work completion rate
Sprint 3 Work Completion Statistics
Total number of user stories implemented: 6
Total number of estimated ideal work hours completed: 34
Total number of days: 7
Average user stories implemented per day: 6/7 or approximately 0.857
Average ideal work hours spent per day: 34/7 or approximately 6.142

Sprint 2 Work Completion Statistics

Total number of user stories implemented: 3

Total number of estimated ideal work hours completed: 36

Total number of days: 7

Average user stories implemented per day: 3/7 or approximately 0.429

Average ideal work hours spent per day: 36/7 or approximately 5.14

Sprint 1 Work Completion Statistics

Total number of user stories implemented: 3

Total number of estimated ideal work hours completed: 38

Total number of days: 7

Average user stories implemented per day: 3/7 or approximately 0.429

Average ideal work hours spent per day: 38/7 or approximately 5.43

Total Work Completion Statistics

Total number of user stories implemented: 6

Total number of estimated ideal work hours completed: 74

Total number of days: 14

Average user stories implemented per day: 6/14 or approximately 0.429

Average ideal work hours spent per day: 74/14 or approximately 5.29
